PIÑA VIDA

A start-up bank and cryptocurrency exchange needed a secure data centre fully in the cloud

KEY FACTS

- A COMPLEX CLOUD-BASED MULTI-SITE DATABASE DEVELOPED OVER 18 MONTHS
- OPTIMISED API LINKS TO ON-SITE SYSTEMS
- A LOW-LATENCY SECURE DATA TRANSFER MECHANISM TO SUPPORT HIGH VOLUME TRANSACTIONAL DATA

Challenge

Our client was a new business that needed the full infrastructure solution build from start to finish to support the complex data flows and with a highly scrutinized data security model.

Without this, the business would not be able to support the financial data transfer requirements to support its customers.

Solution

This complex solution design was developed and architected by Pina Vida Architects entirely in the cloud.

We worked to support this new type of business spending time understanding the functional requirements of this new product in order to ensure that the solution was tailored to their complex business need.

Let's build something great together

Lots of companies can develop software for you.

Few can truly deliver the results you actually want.

Our Delivery-First approach means
your projects are guaranteed to succeed

So, if you'd like an honest discussion about
a new or ongoing project that is 100% focussed
on quality delivery, we'd love to talk to you.
